

How to Print the Alphabet Mini-Book

My ABC's

1

The first two pages of this PDF are these instructions. The following six pages are meant to be printed double-sided. There are several ways to do this.

Using a copier: Make a single-sided copy from your computer. Separate the two instruction pages. Then use your copier to make as many double-sided copies (of the remaining 6 pages) as you need. If your copier does not make double-sided copies from single-sided copies, you can copy the odd pages first, and then put that paper back into the copier to copy the even pages next.

From your computer: If you do not have double-sided print capability from your computer, simply print only odd pages first, then re-insert the pages back into the printer and print only even pages. Then remove this instruction page before continuing to make your mini-book.

How to Assemble the Alphabet Mini-Book

- 1) With the three printed pages in your hand, turn them over so that Page 1 (My ABC's) is on the top. Looking at the upper-right hand of three printed pages in your hand, they should be in the following order: page on top is "My ABC's", middle page is "D", and third page is "G."
- 2) Cut the three pages all at once on the horizontal line with the scissor icon on it.
- 3) Place the upper pages (with the "My ABC's" page facing you) on TOP of the lower pages.
- 4) With the front page of the mini-book on the right, and the back page on the left, now fold the mini-book in half .
- 5) Take a brief look through the mini-book to make sure the numbered pages are in order, and then staple the book along the left-hand edge to make a binding.
- 6) Color your mini-book!
